

## **Sonoco and Pacific Paper Tube Form Alliance to Strengthen Product and Service Offerings for West Coast Construction Industry**

April 27, 2006

HARTSVILLE, S.C., April 27 /PRNewswire-FirstCall/ -- Sonoco (NYSE: SON), the market and technology leader in the design and manufacture of concrete construction forms, and Oakland, California-based Pacific Paper Tube, Inc. today announced that they have formed an alliance in which each organization will provide Sonotube(R) brand concrete construction forms to West Coast distributors, builders and contractors.

The new alliance has been established to combine Sonoco's industry leading technology, the strength of the Sonotube brand and Pacific Paper Tube's recognized service to the West Coast construction industry.

Patrick Wallace, president of Pacific Paper Tube, says the alliance is an exciting opportunity for the construction industry on the West Coast, particularly in fast-growing construction markets in northern California, Seattle and Las Vegas.

"In geographic areas experiencing expansion, there's a great need for innovative building products," Wallace said. "Sonoco has an incredible line of technologically advanced products, specifically designed to save contractors time and money. We are pleased that we can now make these products available locally."

John M. Colyer, Jr., division vice president and general manager, for Sonoco's North American Industrial Products division, says he looks forward to working with Pacific Paper Tube in serving markets on the West Coast.

"Pacific Paper Tube is well known for its flexibility, agility and responsiveness, which leads to excellent customer satisfaction and service delivery. We hope to complement and enhance that reputation," Colyer said.

Colyer added that Sonoco's extensive product portfolio, as well as the company's research and development capabilities, will increase the choices that Pacific Paper Tube can provide customers. "Sonoco's product line will bring the kind of innovative technology that will help Pacific Paper Tube broaden its already impressive range of products," he said.

Earlier this year, Sonoco completed the North American roll-out of its new Sonotube(R) concrete construction form with RainGuard(TM) technology, a proprietary fiber form with improved strength, toughness and durability in wet conditions that allows contractors to set the forms even in wet weather, and still pour concrete the next day. The new forms give contractors added scheduling flexibility to complete construction projects on time.

The Sonotube brand is recognized worldwide in the construction industry. The Sonotube family continues to expand with innovative products and features designed to make forming projects easier. Product lines include Sonotube Round forms, Sonotube Finish Free(R) concrete forms, and Sonotube Square concrete forms.
